

FASTENING & GROUNDING CLIP

FOR FRAMED MODULES AND STEEL STRUCTURES

Screwless and tool-free clipped fastening solutions provide fast and simple assembly. It allows customers to reduce the overall cost of renewable energies.

PowAR Snap[®] S

COMBINED PV MODULE
FASTENING & GROUNDING CLIP

BENEFITS

))) PERFORMING

- Conforms to UL STD 2703 (Ed.2015)
- Tested by accredited laboratories and qualified by major module manufacturers
- High protection against corrosion and lightening
- Grounding continuity of the string preserved when a module is dismantled for maintenance
- Anti-theft designed

))) QUICK

- Fastening and grounding in a single operation
- 1 module installed within 30 seconds⁽¹⁾

))) EASY TO USE

- Tool-free set up
- Minimal training required
- Intuitive: the "click" signals job is properly done
- Friendly: no need for climbing on structure, panels can be inserted from underneath the array

))) COST SAVING

- Lower overall costs of the PV installation
- Lower land investment and structure savings thanks to minimized inter module gap: up to 3% more modules per available surface
- Lower maintenance costs: Screw-less, no periodic torque control required
- Hot spot risk reduction for PV modules thanks to elastic mechanical clamping⁽²⁾

(1) According to field tests results available on demand

(2) Mechanical shocks and daily thermal cycles often induce micro-cracks within cells, leading to hot spots and power output degradation.
